

The  
Climate Change Leadership Institute

December 15, 2021

Edie Dillman  
Public, PBC  
3900 Paseo Del Sol  
Santa Fe, NM 87507

Dear Edie,

In honor of your and Public, PBC's outstanding ingenuity and vision designing and building state of the art homes that are truly sustainable, affordable and made with fairness, we proudly present you with the 2021 Climate Innovation Award.

The Climate Change Leadership Institute (CCLI) is giving out this award and while we are just a small community based non profit, we honor mighty displays of leadership in combatting the climate crisis. We give out 6 awards per year to those who make outstanding contributions in the solution areas of Justice, Direct Action, Courage, Conservation, Education and Innovation.

You and your team are so deserving of this Climate Innovation Award. The prefab homes that you develop are not just low impact, they require 80-90% less energy than standard homes, the materials used sequester carbon dioxide, the heating systems are all electric energized by heat pumps, the design solutions employed are clearly aimed at being fossil fuel free and encouraging conservation, and the sustainability list goes on. Not only that but also your mission is deeply rooted in enabling affordability and achieving social equity. Furthermore, you are a woman owned and led company which is empowering and you're a public benefit corporation which shows integrity.

For these reasons and more, you and your team are innovative stewards helping to revolutionize the realm of home building and design. Thank you for all you've done, what you are accomplishing and aspiring towards. We wish you on-going success.

With much appreciation,

Robb Hirsch  
Founder and Executive Director  
Climate Change Leadership
